## INSWINGING DOOR

### electric

### DESCRIPTION

- Inward-opening electric door.
- Separate operation of door leaves. (optional)
- Pneumatic emergency system with buttons with transparent cover, and LED lighting. (optional)
- Module DM4 Masats. (emergency)
- Ready for single or double leaf glass doors.
- Emergency override at vehicle speed > 3Km/h.
- Electric sensitive edge. (optional)
- Doors in black anodised colour.
- Sensitivity setting by Masats multiplexed CAN BUS ECU electronic control box adaptable to the vehicle.
- New lock integrated in the glass. (optional)
- New compact flap.

### ADVANTAGES

- Quick opening door.
- Weight reduction.
- Increased clearance, thanks to the new compact lower flap design.
- Ease and reduction of assembly time.
- Fixing anchorages common with other sliding door systems, making it possible to interchange it with other equipment.
- The mechanical components, such as leaves, bars and supports, are common between the electric and pneumatic versions.
- Masats modular handles.

### TECHNICAL DATA

- Working temperature: -30°C + 70°C
- Nominal voltage: 12/24v ±20%
- Pursuant to regulations R107 and R118.
- For Class I and II vehicles.
